SUMMARY

Results-driven Senior Network Engineer with 10+ years of experience designing, implementing, and maintaining secure, high-availability network infrastructures. Skilled in Cisco technologies, AWS networking, and datacenter planning. Proven success in automation, troubleshooting, and delivering scalable hybrid solutions across on-prem and cloud environments.

EXPERIENCE

Senior Network Infrastructure Engineer

Ameria Bank

December 2025 – Present, Armenia

- Design, implement, and maintain a highly available network infrastructure, achieving 99.9% SLA.
- Drive automation of daily network operations, reducing manual tasks and operational risk.
- Troubleshoot and resolve escalated tickets from the service desk.
- Maintain up-to-date network and service flow diagrams and supporting documentation

Senior Network Engineer

B2B

December 2024 – December 2025, Germany

- Designed and implemented secure, high-availability network infrastructures across multiple client environments, maintaining 99.9% SLA performance.
- Integrated advanced monitoring and diagnostic solutions to proactively detect and resolve network issues.
- Ensured maximum uptime across diverse client environments, achieving 99.9% network availability.
- Created and maintained network, service flow topologies.

Network – Cloud Network Engineer

Worldline UK

June 2022 - November 2024, London, UK

- Managed high-availability hybrid network infrastructures, supporting multiple sites and cloud connections, achieving 99.9% network uptime.
- Collaborated with application and DevOps teams to ensure seamless integration, reducing deployment-related network issues.
- Designed secure routing and traffic flow solutions, implementing BGP, OSPF, and firewall policies to optimize performance and security.
- Developed detailed network documentation and topology diagrams, improving operational efficiency and accelerating troubleshooting.
- Troubleshot escalated network tickets from the NOC, ensuring 100% SLA compliance.

Senior Network Engineer

Byblos Bank Armenia

November 2015 - May 2022, Yerevan, Armenia

- Designed, implemented, and managed enterprise network security with next-gen firewalls.
- Implemented traffic engineering to achieve service flow quality by 100%.
- Implemented automated configuration backups to achieve failover recovery by 100%.
- Datacenter setup, POC testing.
- Integrated monitoring for network server infrastructure achieving 100% visibility.
- Produced detailed documentation for compliance and operations.
- Created service flow topology decreasing troubleshooting time.
- Troubleshot escalated network tickets from the help desk, ensuring 100% SLA compliance.

Network Engineer

Rostelecom Armenia ISP

December 2014 - November 2015, Abovyan, Armenia

- Managed configurations, updates, and backups for network devices.
- Achieved 99.9% network uptime by configuring and optimizing redundancy protocols to prevent single points of failure.
- Resolved network-related tickets escalated by the help desk team, maintaining a 100% SLA compliance rate.

System Network Administrator (contract)

CrossHitech

May 2014 - December 2014, Yerevan, Armenia

- Planned and implemented a highly available network infrastructure achieving 99.9% uptime for services.
- Installed and configured Linux servers on the ESXi virtualization platform.
- Deployed a mail server on CentOS.
- Implemented Fail2Ban on servers to enhance security.
- Installed and configured Nagios Core on CentOS for comprehensive network and server monitoring, ensuring 100% infrastructure visibility.
- Deployed a file sharing server using Samba on CentOS.
- Configured IPtables to strengthen system security.
- Automated tasks using Crontab.
- Managed directory synchronization with Rsync, ensuring data integrity across system.
- Implemented server backup solutions using Veeam Backup, ensuring 100% reliable data recovery.

Senior Network Administrator

Arpinet ISP

January 2012 - April 2014, Vagharshapat, Armenia

- Planned and deployed wired and wireless network projects.
- Deployed network security measures to protect infrastructure.
- Improved network reliability and redundancy, achieving 99.9% uptime while maintaining performance standards.
- Troubleshoot escalated network tickets from the help desk, ensuring 100% SLA compliance.

EDUCATION

Master of Engineering in Informatics & Computer Science

NUACA • Yerevan, Armenia • 2011 – 2013

Bachelor of Information Technology

YUMIT • Yerevan, Armenia • 2006 – 2010

Trainings

AWS Solutions Architect – Associate

Pluralsight • 2022

CCNP

NetworkLessons • 2023

CCNA

Cisco Network Academy Armenia • 2015

SKILLS

Network Engineering, Design of Computer Networks, Failover Solutions, Network Configuration & Performance Analysis, Bandwidth Optimization, Network Traffic Engineering, Topology Design, Network Documentation , Network Troubleshooting & Optimization, Cloud Connectivity, Hybrid Network Integration, Proof of Concept (PoC), Network Migration, Automation & Documentation

Cisco Nexus, Cisco Catalyst, Juniper, MikroTik, Ubiquiti, D-Link, EIGRP, OSPF, BGP, HSRP, VRRP, GLBP, STP, LACP, vPC, PAgP, IPSLA, PBR, Route Maps, VLAN, Load Balancing, BFD.

Cisco ASA, Fortigate, Palo Alto, pfSense, Sophos, MikroTik, Iptables, Fail2Ban, ACL, NAT, IPS, IPsec, DMVPN, Forward Proxy, VPN Implementation.

CentOS, Linux Bash Scripting, Rsync, Samba, SSH, Cron, Microsoft Hyper-V, VMware ESXi, Hardware RAID, Backup & Restore (Veeam).

SNMP, PRTG, Zabbix, Nagios Core, Wireshark, SPAN, AWS Networking, High Availability (HA) Cluster, HAProxy, DHCP, DNS, Terraform, Ansible, Bitbucket, Confluence, ServiceNow (SNOW), Lucidchart.

English - B2, Russian – B1, Armenian – Native
